

Don't know where to start with cyber security?

The Cyber Essentials Readiness Tool is a free resource to start your journey to getting Cyber Essentials

Answer questions about your organisation's cyber security. Save and return to complete when convenient.

Simple guidance helps you understand the **five controls** and how they relate to your business.

We'll use your answers to create **tailored guidance and a step-by-step action plan** to help you get your certification.

Download or print your readiness action plan and work your way through the action items.

Once completed, you can start the Cyber Essentials **certification process** and secure your business.
